

FUNCTIONAL CARBON FOR THE RATION · ANIMAL LINE

CarboFeed

Clean on the inside so the animal gets more out of the feed.

REFERENCE RATE

100 g/head/day
☐ Nationally manufactured

☐ Our own technology

☐ Validated in ruminants

What it is

A powdered supplement of activated carbon with minerals, probiotics, digestive cofactors and phytobiotics. High adsorbent capacity and biological support, made in Paraguay with our own technology.

Why it works

Adsorbs toxins

Adsorbs toxins, gases and mycotoxins from the feed and the digestive tract before they harm the animal.

Protects liver and microbiota

Protects the liver and the microbiota, and reduces unwanted fermentation.

Carrier for microbiology

The carbon carries microbiology into the rumen: that is why the program with MicroFeed does more than either product alone.

Less methane

Reduces methane emissions, supported by international literature. A secondary benefit, never the main argument.

What to expect

Every figure states its evidence level

+20 %

Weight gain over the full 90-day finishing cycle

MEASURED RESULT
+35 %

Improvement in feed conversion in trials with heifers

MEASURED RESULT

Where and how to apply

SYSTEM	RATE	APPLICATION METHOD
Ration	100 g/head/day	Mixed into the ration
Poultry	Expanding	Broilers and layers, following validation in ruminants

Validated in ruminants; expanding into broilers and layers. Store dry.

The case behind every figure

Sector, region and scale; never the grower’s name

MEASURED RESULT Feedlot: 35% improvement in feed conversion

CarboFeed plus MicroFeed program: 20% more weight gain over the full 90-day finishing cycle and a 35% improvement in feed conversion in trials with heifers.

TRIAL IN PROGRESS Poultry: expanding

Validated in ruminants; supplementation of broilers and layers is expanding.

Technical data

Format	Powder
Base	Activated carbon with minerals, probiotics, digestive cofactors and phytobiotics
Species	Ruminants; expanding into broilers and layers
Storage	Dry, shaded
Origin	Made in Paraguay
Use	Mixed into the ration

Works with

MicroFeed

The probiotic the carbon carries to the rumen.

SiloFeed

The stable silo that completes the ration program.

Before you dose, test your water

Hardness, salinity and chlorine in drinking water all affect how well biologicals work. In the Chaco, water analysis is mandatory protocol.
